

Metalmix™

2. Lighter Weight Than Filament Fiber

Covers Ansi Cut 2-8, ISO13997 B-F; About 20% less weight than same level filament fiber glove.

Weight Comparison (ANSI Cut Level 4)

3. “Reinforced Concrete” Combination

Coating combines better with staple fibers; 60% more coating depth than filament fiber gloves. More durable and requires larger force to peel off.

Filament Fiber
561mm

Staple Fiber
898mm

4. Sweat Evaporation

Sweat evaporates faster through staple fibers than filament fibers; help hands stay dry and cool through out works.

Staple Fiber (Water Absorption) Filament Fiber

Smart Knitting Factory

Hanvo New Material Co.,Ltd - a brand new yarning and knitting factory has been put in use in 2020. This smart factory utilize high-tech production and management systems, delivering high and stable quality glove liners to Hanvo’s dipping lines.

MetalQ™ - a globally patented cut resistant liner; an innovation of Hanvo New Material; an important ingredient of Metalmix™.

Metalmix™ STAPLE FIBER GLOVES

Metalmix™

MetalMix™ represents Hanvo’s staple fiber Gloves. Staple fiber gloves are specially yarned and knitted, providing better comfortability, cut resistant, coating combination, and many other advantages. We now offer a full range of cut resistant staple fiber gloves from A2-A8, 13G and 18G.

1. Cotton Like Feeling

Hairy surface feels more like cotton. It fits hands better than filament fibers, and brings better wearing experience.
